ARMACOST & ROYSTON, INC.

BREEDERS OF FINE ORCHIDS

LOS ANGELES 25, CALIFORNIA

CATTLEYA HYBRIDS FROM 1½" POTS UP

In the year since our last catalog was issued we have, of course, seen the first flowers on several of our later crosses. These flowers encourage us to even greater faith in the stud plants from which they were raised.

This stud is a collection of the finest internationally proven breeding plants combined with our own private stock of parent plants selected over the years from earlier Armacost & Royston introductions. These latter, by repeated fine performance as parents, have taken their own place as valued "proven breeders". They appear often in the parentages in the later pages of this catalog and their record of fine results increases still further our confidence in offering these yet unproven seedlings to you.

As is our usual custom, the prices are for single lead plants, although often the plants we send out have more than one lead. Descriptions are of necessity brief, but we believe adequate, although, of course, we will be glad to give additional information with regard to any of the items.

ARMACOST & ROYSTON, INC.

Spring, 1949

Los Angeles 25, California

- Plants are offered strictly subject to prior sale.
- This catalog cancels all previous lists and special quotations.
- Prices subject to change without notice.
- It will be readily understood that it is impossible to keep orchid plants stationary with regard to pot size whilst they are catalogued. Potting must be done as it becomes necessary. Because of this we shall substitute sizes of plants in filling orders unless we are specifically instructed not to do so.
- All orders will be packed free of charge and will go out Railway Express collect unless we are instructed otherwise. The plants are packed securely and on arrival should be examined and then signed for. If there is any damage, notify the express company, have their agent see the damage and file claim with him.

| Variety | | Size | Price |
|---------|---|------------------------------|---|
| 161 | LC. BRACEYANA (Lc. Lustre, W'birt. var. x C. labiata, W'birt. var.) One of our best introductions. Flowers large, of noble proportions. Sepals and petals are deep rose to rose-purple. The lip intense crimson-purple with some orange in the throat. Usually summer and early fall bloomer, but can be variable. | 4½" 5" 5½" | \$17.50 20.00 25.00 |
| 169 | LC. CONQUISTADOR (C. labiata, W'birt. var. x Lc. Morvyth mag.) Similar to No. 161, even richer in color but not quite so fine a shape. Blooming around the same time, it is a high quality Cattleya. | 5" 5½" 6" | \$22.50 27.50 32.50 |
| 496 | C. ACHINE (C. labata x C. Maggie Raphael) Made with superior parents this is a fine strain of this hybrid. It is exceedingly strong growing and free flowering. Fine for cut flowers. Flowers are large and several to the spray. Medium to deep rose sepals and petals with a dark lip, heavily veined with gold. Fall blooming. | 5½" 6" | \$15.00 20.00 |
| 538 | C. MONARCH (C. Empress Frederick x C. Trianae, Grand Monarch, F.C.C.) Bred from Trianae, Grand Monarch, our strain of this hybrid is larger than usual and varies considerably in color from lavender to deep rose. Exceedingly free flowering, blooming from November until March. | 4" 4½" 5" 5½" | \$10.00 12.50 15.00 20.00 |
| 867 | C. BRUSSELS ALBA (C. Harold alba x C. Mossiae Reineckiana) Exceedingly free, sepals and petals white; the lip, purple at the base with a light yellow throat. An extended season from October until June. | 4" 4½" 5" 5½" 6" | \$15.00 17.50 20.00 25.00 30.00 |
| 878 | C. FABIANID (C. Enid x C. Fabia) Well known hybrid. Strong growing. Very free flowering. Somewhat variable as to season but late fall and early winter predominating. Sepals and petals deep lavender to rose. Lip dark, rich crimson-purple with light yellow and gold veining in the throat. | 5" 5½" 6" | \$15.00 20.00 25.00 |
| 945 | LC. SEAFORTH (C. Intertexta x Lc. Locarno) One of the freest flowering Laeliocattleyas we know and of unusually good shape. Variable as to season but late fall and early winter seem to predominate. Sepals and petals are deep lavender to rose. The large lip is rich crimson with yellow and orange in the throat. | 4½" 5" 5½" 6" | \$20.00 22.50 27.50 32.50 |
| 1031 | C. Trimos (C. Mossiae x C. Trianae, Edgar Knight) Probably the deepest colored Trimos yet raised. Even the sepals and petals are a deeper shade of lavender and the lips in most cases are solid, deep, rich purple. It is exceedingly free flowering, commencing to bloom in March and finishing in early May. | 4" 4½" 5" 5½" 6" | \$10.00 12.50 15.00 20.00 25.00 |
| 1163 | LC. MIMBRENO (Lc. Sargon, W'birt. A.M. x C. Octave Doin) Great range of color here. In some cases almost white sepals and petals with a rich lip; others, light lavender to intense, deep rose with large, dark lips and rich throats. Season variable but winter and early spring principally. | 5" 5½" 6" | \$15.00 20.00 25.00 |

| Variety | | Size | Price |
|---------|--|------------------------------|---|
| 1171 | C. PROSPECTOR (C. Santa Monica x C. Remy Cholet) . . . The best cut flower Cattleya we know of. Strong in growth, exceedingly free flowering. Sepals and petals are medium lavender to rose, dark lip, yellow to orange throat. Commencing to bloom in October, this variety blooms through the winter until April. | 4" 4½" 5" 5½" 6" | \$20.00 22.50 25.00 30.00 |
| 1172 | C. DIPLOMAT (C. hivernalis x C. Remy Cholet) . . . Similar to above but larger and lighter in color in the sepals and petals. Blooming around the same time. | 4" 4½" 5" 5½" 6" | \$12.50 15.00 17.50 22.50 27.50 |
| 1185 | LC. YENBO (C. H.S. Leon x Lc. Marie Dobrott) . . . A spectacular grower of great strength. Very free flowering. Flowers are large, light to medium lavender sepals and petals with darker lip. Yenbo has fine form and is a very worthwhile cut flower variety. | 5" 5½" | \$12.50 17.50 |
| 1232 | C. LOS ALTOS (C. Sir Walter Scott x C. Hentschelii) . . . Exceedingly free flowering spring bloomer, greatly resembling C. gigas of which it is largely composed. It is similar in color and form but much freer blooming. | 5" 5½" | \$12.50 15.00 |
| 1250 | LC. DULZURA (C. Harold alba x Lc. Canhamiana alba) . . . A strong grower and a great improvement over Canhamiana alba. Its one fault is that in many cases there is a slight lavender flush in the petals. The season is variable but principally spring. | 5" 5½" 6" | \$20.00 25.00 30.00 |
| 1265 | C. CLARIBELLE (C. Thorout x C. Dinah, A.M.) . . . A spectacular Cattleya producing several extremely large flowers to the spray. Bright warm rose-pink color with a darker lip and some yellow in the throat. This hybrid, we believe, will prove a worthwhile parent, possibly even better than its parent, Dinah. | 5" | \$20.00 |
| 1359 | LC. OROSI (Lc. Marie Dobrott x C. Tityus var. The Pearl) . . . Like most hybrids from Lc. Marie Dobrott this is an exceedingly strong and spectacular grower and is very free flowering. Flowers large, several to the spray. Sepals and petals a delightful shade of lavender-rose with a darker lip and yellow to orange throat. Usually summer but is variable. | 5" | \$15.00 |
| 1368 | C. AMABILIS (C. labiata x C. gigas, Low's var. F.C.C.) . . . Exceedingly free flowering and a fine commercial Cattleya. Deep lavender to medium rose. Dark lip. Summer and early fall. | 5" | \$12.50 |
| 1376 | LC. MERCED (Lc. Marie Dobrott x C. labiata, W'birt, var.) . . . A happy combination of parents, this hybrid is exceedingly strong growing. Several flowers to the spray all of which are large and of medium color. The labiata parent was the finest form of labiata we know of. Fall and early winter. | 4½" 5" 5½" | \$15.00 17.50 22.50 |
| 1940 | C. ESTELLE ALBA (C. Cowaniae alba var. Enchantress x C. Edithiae) Those who know our strain of Estelle alba know it to be one of the most satisfactory white Cattleyas yet raised. Remarkably free flowering with considerable variation in the size and form of the flowers but its production is phenomenal. The season, October to June with some variability. | 4" 4½" 5" 5½" | \$20.00 22.50 25.00 30.00 |

| Variety | | Size | Price |
|---------|---|------------------------------------|---|
| 2508 | LC. EDITH WILLKIE (Lc. Mrs. Harold Lloyd x C. "Dinah, A.M.") . . . We have sold so many plants of this hybrid that it should be well known. It is a spectacular orchid from point of its growth, size, color and quantity of the flowers. We have used selected forms of this hybrid as a parent and we are sure that other growers will also. It has strength, flower production, color and amazing vigor. | 4" 4 1/2" 5" 5 1/2" | \$15.00 17.50 20.00 25.00 |
| 2511 | C. HEATHERWOOD (C. Tityus var. The Pearl x C. Mossiae var. Countess Grey F.C.C.) . . . When remaking an older hybrid we endeavor to use superior parents and in this case the results are very definite. Our strain of C. Heatherwood is a superior one from every point of view. The flowers are larger, of better shape and richer in color. Blooming spring and summer. | 4 1/2" 5" 5 1/2" | \$12.50 15.00 20.00 |
| 2514 | C. SUZANNE HYE ALBA (C. Gaskelliana alba x C. Mossiae var. Wageneri F.C.C.) . . . We have raised several batches of this hybrid from the same parent plants. They are good and free flowering but a small percentage have faint lavender coloring in the lip. | 3" 3 1/2" 4" 4 1/2" 5" | \$ 7.50 10.00 12.50 15.00 17.50 |
| 2534 | LC. KEOKUK (Lc. Marie Dobrott x C. Hardyana) . . . Extra large flowers favoring Lc. Marie Dobrott. Variable in flowering season, early fall predominating. | 5" 5 1/2" | \$17.50 22.50 |
| 2546 | LC. SAM HOUSTON (Lc. Marie Dobrott x Lc. Morvyth, magnifica) A strong grower. Flowers are large, of fine form and good texture. Sepals and petals are predominantly a deep, warm rose with an intense crimson lip with gold to orange area in the throat. The flowering season is variable as there are nearly always some plants in bloom. | 5" 5 1/2" 6" | \$15.00 20.00 25.00 |
| 2635 | C. REINDEER (C. Trimos x C. Remy Cholet) Winter and spring bloomer, very free. The flowers are large, medium lavender sepals and petals with large dark lips. | 4" 5" 5 1/2" 6" | \$10.00 12.50 15.00 17.50 |
| 2708 | LC. TEXAS (C. Fabianid x Lc. Conquistador) . . . Variable bloomer, fall predominating. This hybrid is quite variable in quality. Some of the finest Laeliocattleyas we have raised have appeared in this batch. They are large, of fine shape and substance and excellent color. | 5" 5 1/2" 6" | \$15.00 20.00 25.00 |
| 2735 | C. JEVAN (C. Nebo x C. General Pulteney) Strong growing, free flowering Cattleya. Blooming season from October until March. Medium color. Good form and substance. | 4" 4 1/2" 5" 5 1/2" | \$ 7.50 10.00 12.50 15.00 |
| 2828 | C. ENID (C. gigas x C. Mossiae var. Countess Grey F.C.C.) . . . Long recognized as one of the best commercial Cattleyas. Our strain is well known; the flowers are much larger, of excellent form and quality. Most Enids are free flowering, this one exceptionally so, blooming more than once a year. | 4" 4 1/2" 5" | \$12.50 15.00 17.50 |
| 2869 | LC. FORTY-NINER (C. Chrysotoxa x Lc. Mrs. Medo var. Aurantica) Like all hybrids of this type there is considerable variation in form and in depth of color and some most pleasing shades and types have appeared among them. Summer bloomer. The color ranges from chartreuse through yellow to deep orange with blending red lips, some of which are isthmus shaped, some round. | 4" 4 1/2" 5" 5 1/2" | \$15.00 17.50 20.00 25.00 |

| Variety | | Size | Price |
|---------|---|-------------------------------|---|
| 3073 | C. BANDIT (C. Nebo x C. Tityus, var. Patriarch) A very fine winter bloomer. Tityus Patriarch has transmitted the fine texture and rich throat which are characteristic of this parent and the sepals and petals are warm rose-purple. | 4½" 5" 5½" | \$22.50 25.00 30.00 |
| 3121 | C. PORTOLA (C. Profusion x C. Mrs. F. Knollys) Could be described as a much improved Empress Frederick. Blooming in the spring and early summer, it is very free flowering. The flowers are large and, for the most part, of excellent color. | 4½" 5" 5½" 6" | \$12.50 15.00 17.50 20.00 |
| 3145 | C. PRISCILLA MULLENS ALBA (C. Brussels alba x C. Mossiae Reineckiana) A spring and summer bloomer similar to C. Mossiae Reineckiana. Flowers are large. Sepals and petals are white, prettily fringed with crimson-purple veining at the base and strong yellow in the throat. | 4½" 5" 5½" | \$15.00 17.50 22.50 |
| 3210 | C. VARUNA (C. Intertexta x C. Annie J. Lines) Exceedingly strong growing hybrid producing flowers of intense color. Variable as to flowering season, late fall and early winter predominating. Some Varunas are in bloom almost every month in the year. | 4½" 5" 5½" 6" | \$12.50 15.00 20.00 25.00 |
| 3212 | C. MITHRA (C. Mount Royal x C. Intertexta) In most cases deep, rich rose, all have dark brilliant lips. We consider Mithra a fine Cattleya hybrid. The season is variable, usually winter. | 4" 4½" 5" 5½" | \$12.50 15.00 17.50 22.50 |
| 3229 | LC. HALONA (Lc. Marie Dobrott x C. Profusion) Like all Lc. Marie Dobrott hybrids this is vigorous and free flowering. Flowers are large. Sepals and petals are medium rose. Lip darker with a yellow area in the throat and some gold veining. | 4½" 5" | \$15.00 17.50 |
| 3252 | LC. AGNI (C. Nebo x Lc. Hyperion) Similar to Hyperion in growth and general character. An exceedingly fine Cattleya hybrid of rich color and noble proportions. The season is late winter and spring. | 4" 4½" 5" 5½" | \$15.00 17.50 20.00 25.00 |
| 3264 | C. REMY CHOLET (C. Trianae, Imperator A.M. x C. Monarch) This is the third batch of C. Remy Cholet we have raised. Flowers are large, of excellent shape and substance. Petals are medium to deep lavender, some showing a definite deep colored rib in each petal. A strong growing type bred from an exceptionally fine Trianae. Season winter to early spring. | 3½" 4" 4½" 5" 5½" | \$ 7.50 10.00 12.50 15.00 20.00 |
| 3304 | C. HOSHANG (C. Trianae, Edgar Knight x C. Intertexta) A winter and spring bloomer with some variability. Lavender to light rose sepals and petals with a darker lip. | 5" 5½" | \$15.00 18.00 |
| 3309 | C. ILLUMINATION (C. Belinda x C. Trianae v. Grand Monarch A.M.) Large flower. Fine shape and texture. Good color. Blooming New Year and early spring. | 4½" 5" 5½" | \$12.50 15.00 17.50 |
| 3318 | C. TELLUS (C. Intertexta x C. Prospector) This has proven to be an exceedingly valuable cut flower variety. Flowers are large, of good color with a variable season but predominantly spring and early summer. | 4" 4½" 5" 5½" | \$10.00 12.50 15.00 20.00 |
| 3331 | C. OCEANID (C. Nebo x C. Trimos) Here is a hybrid far surpassing Mossiae in our opinion. The flowers are medium size, compact, good substance and all have solid, dark lips. Very free flowering, the season is from December until April. | 3" 3½" 4" 4½" | \$ 7.50 10.00 12.50 15.00 |

| Variety | | Size | Price |
|---------|---|-------------------------------|---|
| 3381 | LC. GATTON GLORY (C. Mimosa x Lc. Canberra, Stonehurst var.) This well known hybrid varies in color from chartreuse through yellow to deep burnt orange sepals and petals with red lips to harmonize. Usually a summer bloomer, it is a most attractive Cattleya. | 3½" 4" 4½" 5" 5½" | \$12.50 15.00 17.50 20.00 25.00 |
| 3410 | LC. KISHAR (Lc. Braceyanæ x C. Trianae) As is to be expected this has fine form and good texture. Medium color in the sepals and petals and a dark lip. Winter and spring. | 4" 4½" 5" | \$10.00 12.50 15.00 |
| 3452 | C. HEYDEY (C. Profusion x C. Prospector) Considerable variation in color and form but some unusually fine types have appeared among the seedlings which have sold at premium prices. The season is winter and spring but is variable. | 3½" 4" 4½" 5" | \$10.00 12.50 15.00 20.00 |
| 3489 | C. TRIDENT (C. Trimos x C. Mossiae) Definite spring and early summer bloomer. Superior to Mossiae. Amazing production. | 4" 4½" 5" | \$10.00 12.50 15.00 |
| 3491 | C. THULE (C. Trimos x C. Dupreana) Well known spring and summer bloomer. A grand cut flower variety. | 3½" 4" 4½" 5" | \$ 7.50 10.00 12.50 15.00 |
| 3492 | C. IROLDO (C. Trimos x C. Woltersiana) Late winter and spring bloomer with pleasing medium purple sepals and petals and purple lip. A very good cut flower type. | 4" 4½" 5" | \$10.00 12.50 15.00 |
| 3503 | C. ASSAYER (C. Dupreana x C. Prospector) Very worthwhile cut flower Cattleya. Large and free flowering, of good color. Blooming in the spring. | 3½" 4" 4½" 5" | \$ 7.50 10.00 12.50 15.00 |
| 3520 | LC. DEMO (Lc. Fascinator-Mossiae x C. Dupreana) Another good cut flower variety. Free flowering and of good color. Spring and early summer bloomer. | 3½" 4" 4½" | \$ 7.50 10.00 12.50 |
| 3527 | LC. SHAMASH (C. Dupreana x Lc. Hyeana) Rich color and free blooming. Dramatic appearance but lacks shape. May prove valuable as spring bloomer with high color. | 4" 4½" | \$10.00 12.50 |
| 3534 | C. ENKIDU (C. Dupreana x C. Profusion) Similar to Dupreana in general character but not quite so dark although it has ample color to make it an exceedingly good cut flower variety. It has a better constitution than Dupreana with a much more variable flowering season. We think this one of our best cut flower varieties. | 3" 3½" 4" 4½" 5" | \$ 7.50 10.00 12.50 15.00 17.50 |
| 3538 | C. ASHLANDS (C. Dupreana x C. Tityus) Our strain of this hybrid is very worthwhile. The flowers are large and very rich in color. An extended flowering season. We seem to have flowers of this variety practically the year round. | 4" 4½" 5" 5½" | \$10.00 12.50 15.00 20.00 |
| 3539 | LC. ENLIL (C. Dupreana x Lc. Tartan) Late spring and summer bloomer resembling C. Dupreana but darker in color and showing the Laelia influence in shape. Free flowering and very worthwhile. | 4" 4½" | \$10.00 12.50 |
| 3543 | LC. TIMBRE (C. Dupreana x Lc. Agnes Frawley) A variable bloomer of large size, good form and color. | 4" 4½" 5" | \$10.00 12.50 15.00 |

| Variety | | Size | Price |
|---------|--|-------------------------------|---|
| 3557 | LC. RONDEAU ALBA (Lc. Fascinator-Mossiae alba x C. Nutley alba) Of good size and form with a large, flat gigas lip of good color. Spring and summer bloomer. Some have lavender flushed sepals and petals. | 3½" 4" 4½" 5" | \$ 7.50 10.00 12.50 15.00 |
| 3560 | C. GAMUT (C. Prospector x C. Dinah, A.M.) This proved to be finer than we had anticipated. The flowers are of perfect form and are a warm rose-pink color with a darker lip. Very large, free flowering and a vigorous grower. Spring and summer seem to be the season although it is somewhat variable. | 4" 4½" 5" 5½" | \$15.00 17.50 20.00 25.00 |
| 3563 | C. TAHMURATH (C. Mossiae x C. Dinah, A.M.) The C. Dinah parent is not so dominant in this cross as it usually is. The flowers show much of C. Mossiae form but those we have seen have a solid colored lip and bloom during winter and spring. | 4" 4½" 5" | \$12.50 15.00 17.50 |
| 3564 | C. IRAN (C. Harold x C. Prospector) Best described as intermediate between both parents. Blooming late spring and early summer this is an exceedingly free flowering Cattleya and well worthwhile from the cut flower point of view. | 4" 4½" 5" | \$10.00 12.50 15.00 |
| 3568 | LC. CANTABILE ALBA (Lc. Fascinator-Mossiae alba x C. gigas, F.M. Beyrodt F.C.C.) Exceedingly free flowering alba blooming in the winter predominantly but somewhat variable. Flowers are large. Heavy white sepals and petals with solid crimson-purple lip with yellow throat. | 3½" 4" 4½" 5" | \$ 7.50 10.00 12.50 15.00 |
| 3570 | C. MIMIR (C. Mount Royal x C. Prospector) Fall and winter bloomer. Flowers are large, of good shape. Warm rose-pink sepals and petals with a darker lip and some yellow in the throat. | 3½" 4" 4½" | \$10.00 12.50 15.00 |
| 3571 | C. MIRZA (C. Mount Royal x C. Warneri) Excellent shape and texture. Good size and color. A good variety for cut flower purposes. Variable flowering season. | 3½" 4" 4½" 5" 5½" | \$ 7.50 10.00 12.50 15.00 20.00 |
| 3574 | C. DUPREANOLD (C. Dupreana x C. Harold) Well known hybrid blooming spring and early summer. Our strain gives large flowers of good medium color. A splendid cut flower variety. | 3½" 4" 4½" | \$ 7.50 10.00 12.50 |
| 3575 | C. WALLACE BEALL (C. Dupreana x C. Intertexta) A Dupreana hybrid of merit. The flowers are large and of good medium color. Spring and summer bloomer. | 4" 4½" 5" 5½" | \$10.00 12.50 15.00 20.00 |
| 3576 | C. ALCINA (C. Gay Gordon x C. Prospector) Gay Gordon and Prospector are a happy combination. Flowers are large and of excellent shape and substance. Long stems. Season somewhat variable but an excellent cut flower variety. | 3½" 4" 4½" 5" | \$ 7.50 10.00 12.50 15.00 |
| 3619 | C. EPICURE ALBA (C. Brussels alba x C. Dowiana aurea) Ivory sepals and petals. Crimson-purple lip which is heavily veined with gold and some gold area in the throat. A free flowering spring and summer bloomer. | 4" 4½" | \$12.50 15.00 |
| 3621 | LC. BURDINE JOHNSON (Lc. Hassallii alba x C. Fabianid alba) A strong growing, free flowering white with colored lip. The flowers are large, of good shape; spring and summer predominate as to season but is variable. | 3½" 4" 4½" | \$10.00 12.50 15.00 |

| Variety | | Size | Price |
|---------|--|------------------------------|--|
| 3624 | LC. KRONOS (Lc. Valencia x Lc. Britannia) Still somewhat variable, the season appears to be late summer and fall. Of excellent shape and size. Sepals and petals are a warm shade of lavender-rose. The lip is deep crimson with some gold in the throat. The petals are sometimes feathered at the tips with crimson. | 3½" 4" 4½" 5" | \$ 7.50 10.00 12.50 15.00 |
| 3647 | C. CORFLAMBO (C. Jicarilla x C. ardentissima) The season, fall and early winter. The flowers are large and of unusually rich color as is to be expected from the parentage. Strong growing, very free flowering, we recommend this with confidence. | 3½" 4" 4½" 5" | \$12.50 15.00 17.50 20.00 |
| 3662 | LC. GOLDEN TOUCH (C. Mimosa x Lc. Princess Mary) Variable like all yellows in shape and depth of color. Some are most pleasing but there is some speculation. | 3½" 4" 4½" 5" | \$12.50 15.00 17.50 20.00 |
| 3685 | C. LABIATA (Species) Another crossing of the original parents we used in making our famous strain of labiata, namely varieties Ottawa and Westonbirt. | 4" 4½" 5" | \$10.00 12.50 15.00 |
| 3800 | LC. RODERICK DHU (Lc. Tartan x C. Annie J. Lines) Of variable season, a vigorous grower, rich in color. | 3" 3½" 4" | \$ 5.00 7.50 10.00 |
| 3802 | LC. ROBIN ADAIR (C. Prospector x Lc. Tartan) A rich colored flower for the winter season. | 3" 3½" | \$ 5.00 7.50 |
| 3803 | C. TRIMOS X C. ATHENA A few have bloomed and confirm our expectation of an unusually free winter and spring bloomer of size and color. | 2½" 3" 3½" 4" | \$ 4.50 6.00 8.50 11.00 |
| 3805 | C. REMY CHOLET X C. ATHENA This should prove excellent commercial winter and spring blooming variety. Somewhat richer in color than the above. | 2½" 3" 3½" 4" | \$ 6.00 7.50 10.00 12.50 |
| 3806 | C. PROSPECTOR X C. ATHENA This cross has great possibilities as a winter bloomer. | 2½" 3" 3½" | \$ 6.00 7.50 10.00 |
| 3828 | BLC. JOYANCE (Lc. S.J. Bracey x Blc. Ojai) We are frank to say this is still highly speculative. Those we have seen have rich yellow tones in the sepals and petals and complimentary red lips. A summer bloomer. | 2½" 3" 3½" | \$ 5.50 7.50 10.00 |
| 3832 | LC. S. J. BRACEY X LC. GOLDEN WEST Another speculative yellow hybrid but it should produce some very pleasing color tones. Great interest has been shown in this cross and the preceding one. Sales have been heavy. | 2½" 3" 3½" | \$ 5.50 7.50 10.00 |
| 3844 | C. DOUSABEL (C. Luegeae alba x C. Amabilis alba) The few that have bloomed have had particularly fine form and texture with a prettily marked purple lip. No fixed season as yet. | 2" 2½" 3" 3½" 4" | \$ 6.00 7.50 10.00 12.50 15.00 |
| 3846 | LC. PARIZADE (C. Luegeae alba x Lc. Hassallii alba) We have seen but few of these but they give promise of a brightly lipped alba of good size. | 2½" 3" 3½" | \$ 6.00 7.50 10.00 |

| Variety | | Size | Price |
|---------|---|-------------------------------------|--|
| 3847 | C. PEETERSII X LC. PRINCESS MARGARET Parents involved in this cross are superb. It should be a perfect blending. Season is likely to be fall. We highly recommend this for cut flower purposes. | 2" 2½" 3" 3½" | \$ 6.00 7.50 10.00 12.50 |
| 3874 | LC. INDRA (Lc. Integrity x C. Prospector) The few that have flowered have lived up to our expectations and we still feel this is one to bank on. The parents are both winter and early spring bloomers and superb forms were used of each. | 2" 2½" 3" 3½" | \$ 8.00 9.50 12.00 17.50 |
| 3900 | C. KITTIWAKE (C. Luegeae alba x C. Brussels alba) The indications are for a free flowering alba in the fall and winter. | 2½" 3" 3½" | \$ 6.50 9.00 11.50 |
| 3919 | C. ROSE ANDRADE (C. Edithiae, White Empress F.C.C. x C. Bebe White) The few which have bloomed show great promise for a winter flowering white of good size, form and free flowering quality. | 3" | \$10.00 |
| 3921 | C. ESTELLE ALBA, VERY FINE VARIETY X C. BEBE WHITE It is difficult to imagine a better combination of white parents. This cross, we think, has great probabilities. Should flower winter and early spring. | 2" 2½" 3" 3½" | \$ 6.00 7.50 10.00 12.50 |
| 3922 | C. WHITE SAIL (C. Olive Pierson x C. Bebe White) The few that have bloomed of this cross are large and heavy textured; clear, solid white with much less yellow in the throat than the average white. | 2" 2½" 3" 3½" | \$ 6.00 7.50 10.00 12.50 |
| 3928 | LC. SUSAN McASHAN (C. gigas, F.M. Beyrodt F.C.C. x Lc. British Queen alba) This one has surprised us. Even on small 3" plants the flowers are large. The sepals and petals are white with sometimes a slight lavender flush. The lip, as is to be expected, shows strong influence of speciosissima. Spring bloomer but likely to be variable. It grows well and the indications are that it is one of the freest flowering of all the new seedlings. | 3" 3½" 4" 4½" | \$ 7.50 10.00 12.50 15.00 |
| 3931 | C. ALICE BELDING (C. Mary Chilton alba x C. Vivian alba) A clear white with bright solid purple lip. Predominantly summer season so far. | 2½" 3" 3½" 4" | \$ 7.50 10.00 12.50 15.00 |
| 3932 | C. SERENITY (C. Trianae, Edgar Knight x C. Santa Monica, Goliath) A spectacular Cattleya, it gives very freely large flowers of fine texture and wonderful proportions. The sepals and petals are lavender to rose with dark lip. It should and does make a wonderful parent. Blooms during the winter. | 3" 3½" 4" 4½" 5" 5½" | \$12.50 15.00 17.50 20.00 22.50 27.50 |
| 3933 | LC. CHOIRISTER (C. Brussels alba x Lc. Cynthia) An alba of promise. Fine shape and substance with variable lip, many of them solid purple. Winter flowering so far. | 3" 3½" 4" | \$10.00 12.50 15.00 |
| 3958 | LC. GOLDEN BEAUTY, A.M. X BLC. NANETTE ALBA While an extremely speculative cross, this Brassocattleya should have fine form and substance in varying shades of yellow. We have every confidence in it. | 2" 2½" 3" | \$ 3.00 4.50 6.00 |

| Variety | | Size | Price |
|---------|---|------------------------------|-----------------------------------|
| 3983 | C. SERENITY X LC. INTEGRITY VAR. STEADFAST To those who know these parents this cross needs no explanation. Both are winter bloomers of superior quality. C. Serenity has fine form and substance and Lc. Integrity is equally as fine with more color. The results should be a perfect winter and spring bloomer. | 2" 2 1/2" | \$ 8.00 9.50 |
| 4013 | LC. PAXINOS (C. Trianae var. Bill Taft x Lc. Marie Dobrott) Any seedlings we have seen from C. Trianae, var. Bill Taft have shown the influence of this parent very strongly and this probably will be no exception. We expect a winter flower of medium depth of rose-purple sepals and petals and a well shaped, bright purple lip and considerable yellow marking in the throat. | 2" 2 1/2" | \$ 7.00 8.50 |
| 4018 | C. PROSPECTOR X C. SANTA MONICA VAR. GOLIATH Here is a mating of two of the finest winter blooming Cattleyas we know of. C. Santa Monica var. Goliath has tremendous substance and shape and C. Prospector is, to our mind, the most profitable cut flower Cattleya yet raised. This cross should prove extremely worthwhile. | 2" 2 1/2" 3" | \$ 8.00 9.50 12.00 |
| 4026 | C. EDITHIAE (C. Suzanne Hye alba x C. Trianae alba, Broomhill var.) It may be possible to make C. Edithiae with finer parents but we doubt it. The seedlings offered are extremely well bred and, of course, C. Edithiae is a fine winter pure white Cattleya and very worthwhile. | 2" 2 1/2" 3" | \$ 6.00 7.50 10.00 |
| 4027 | C. ESTELLE ALBA X C. TRIANAE ALBA, BROOMHILL VAR. We expect this cross to be even finer than the preceding one but at present it is unproven. It will definitely be a winter pure white with a yellow throat. | 2" 2 1/2" 3" 3 1/2" | \$ 6.00 7.50 10.00 12.50 |
| 4050 | C. BRUSSELS (C. Harold x C. Mossiae) (Colored type) This will undoubtedly prove a free flowering Cattleya with an extended season. The sepals and petals should be medium to light lavender with a deeper lip. | 2" 2 1/2" 3" | \$ 3.00 4.50 7.00 |
| 4051 | B. DIGBYANA X C. SUZANNE HYE GRANDIFLORA This cross should produce a primary Brassocattleya pure white except for a greenish-yellow throat. C. Suzanne Hye grandiflora is of unusual size and excellent form with tremendous lip. | 2" 2 1/2" 3" | \$ 5.00 6.50 9.00 |
| 4052 | C. EMPRESS FREDERICK ALBA (C. Mossiae Reineckiana x C. Dowiana aurea) The breeding of the finest Mossiae Reineckiana we know of to a very worthwhile Dowiana aurea should provide an exceedingly fine alba form of this well known Cattleya. | 2" 2 1/2" | \$ 5.00 6.50 |
| 4055 | LC. SCHRODERAE ALBA X C. BRUSSELS ALBA Unflowered but should produce an alba of great merit. We have confidence in this cross; both parents involved being unusually fine forms. Season likely to be fall and winter. | 2" 2 1/2" 3" 3 1/2" | \$ 5.00 6.50 9.00 11.50 |
| 4078 | LC. PETER THE GREAT X C. ENID ALBA Lc. Peter the Great is probably the freest flowering alba in existence. As many as eleven flowers to the spray. The fine C. Enid alba used in this cross should add size and form. Season will doubtless be variable. | 2" 2 1/2" 3" | \$ 5.00 6.50 9.00 |
| 4079 | C. MINA ALBA X C. S.E. ENDICOTT Here is a pure white cross of great possibilities for size, form and free flowering qualities. We recommend this highly. | 2" 2 1/2" 3" | \$ 6.00 7.50 10.00 |

| Variety | | Size | Price |
|---------|---|------------------------|--------------------------|
| 4084 | C. REMY CHOLET X LC. INTEGRITY VAR. STEADFAST . . . This is of course unflowered as yet but we look for a fine winter and spring bloomer of excellent substance and rich color. | 2" 2 1/2" 3" | \$ 7.00 8.50 11.00 |
| 4085 | C. ENID X LC. INTEGRITY VAR. STEADFAST . . . We are always inclined to wax enthusiastic when Lc. Integrity is used as a parent, but we will stay with our custom of understatement and just highly recommend this cross as being a good speculation. | 2" 2 1/2" 3" | \$ 7.00 8.50 11.00 |
| 4095 | LC. CANEVO X C. TITYUS VAR. PATRIARCH . . . Here is a cross we can thoroughly recommend as a winter and spring bloomer. It undoubtedly will have size, excellent form and substance. Medium to deep color in the sepals and petals and an extra fine lip. | 2" 2 1/2" | \$ 6.00 7.50 |
| 4121 | C. HENRIETTA JAPHET (C. Loddigesii x C. Eucharis) . . . A white of heavy texture with small to medium flowers and several to a spray. Season unknown as yet. | 2 1/2" 3" 3 1/2" | \$ 5.00 7.50 10.00 |
| 4124 | LC. SANDRA OZZELLA (Lc. S.J. Bracey x C. Dowiana aurea) . . . We recommend this as a most interesting hybrid from Lc. S.J. Bracey, producing flowers from green-yellow to deep bronze with red lips. | 2" 2 1/2" | \$ 4.00 5.50 |
| 4130 | C. MOUNT ROYAL X LC. EMINENCE . . . Of wonderful form and texture and rich in color. The Mount Royal in this cross is the best we know of. We recommend this one also. | 2" 2 1/2" | \$ 7.00 8.50 |
| 4133 | C. SERENITY X BLC. J.K. LILLY . . . A most interesting cross as both parents are superb in shape, substance and color. We consider both of these parents among our best hybrids and anticipate progeny from them with great interest. | 1 1/2" 2" | \$ 3.50 7.00 |
| 4140 | C. MAGGIE RAPHAEL (C. Trianae, Imperator A.M. x C. Dowiana aurea) Trianae Imperator was the parent of the finest strain of Cattleya Maggie Raphael. The aurea used here was one of our own home-raised specialties. Late fall and winter. | 1 1/2" 2" | \$ 1.50 3.00 |
| 4141 | C. FABIANID X C. REMY CHOLET V. VIVICANS . . . Unflowered as yet but both parents were superb of their types. | 1 1/2" 2" | \$ 2.00 4.00 |
| 4142 | LC. CUESTA X C. TRIANAE, IMPERATOR A.M. . . . This cross was made with the thought of producing Cuestas in the winter time. We selected Trianae, Imperator, knowing it was the least likely to take color from Cuesta. | 1 1/2" 2" | \$ 3.00 6.00 |
| 4145 | LC. PASADENA X BLC. J.K. LILLY . . . Pasadena is a hybrid from Lustre and Trianae; J. K. Lilly, from Titymoma var. Roundhead. Color in both parents and outstanding vigor in Pasadena. A hybrid to bank on. | 2" 2 1/2" | \$ 6.00 7.50 |
| 4203 | C. ESTELLE ALBA X (BLC. SNOWDON X BC. HEATONENSIS) . . This should produce a Brassocattleya blooming in the winter time with enough of the Brassocattleya left to give large, beautiful lips, Estelle supplying substance and shape. Color speculative. | 1 1/2" 2" | \$ 2.00 4.00 |
| 4204 | C. LUEGEAE ALBA (C. Enid alba x C. Dowiana aurea) . . . This is a repetition of our fine strain of Luegeae alba which is well known. | 1 1/2" 2" | \$ 2.00 4.00 |
| 4277 | LC. CUESTA VAR. COLOSSUS X C. TITYUS VAR. PATRIARCH . . A mating of Cuesta, Colossus and our fine breeding Tityus "Patriarch" should result in a superb cross combining dark color with the excellent texture and shape which the Tityus "Patriarch" crosses have shown heretofore. We hope for a winter bloomer. | 1 1/2" | \$ 4.00 |
